Hiring Team

Overbond

Greater Toronto Area, ON, Canada

**JOB REFERENCE: Data Scientist - Fixed Income Trading**

Dear Hiring Team,

I am writing to express my interest in the Data Scientist - Fixed Income Trading position at Overbond. With a strong foundation in ML and statistical modeling, combined with hands-on experience in developing AI-driven solutions at CanApply, where I led the development of advanced recommendation systems and search ranking models, I am excited about the opportunity to contribute to innovative approaches to bond trading automation.

Beyond my professional experience, I have independently developed projects including an automatic trading engine for the cryptocurrency market and an options bonds evaluation engine for the Tehran Securities Exchange. These initiatives required rigorous data analysis and model building, particularly in environments lacking centralized pricing data, challenges that mirror the complexities Overbond navigates in bond markets.

I am drawn to Overbond's innovative approach to transforming bond trading with AI and real-time data solutions. My blend of technical expertise and practical experience in trading systems aligns with your goals of increasing trade profitability and improving execution. I am enthusiastic about contributing to your team and am confident in my ability to bring valuable insights and solutions to Overbond.

Thank you for considering my application. I look forward to the opportunity to further discuss how I can contribute to your team and help achieve Overbond's strategic goals.

Sincerely,

AmirMasoud Azadfar
